

PRISM QA Test Report & Defect Log

Scope: 6. Rudi — Windows [Whole Core (No Add-ons) — Shell, Navigation, History, Artifacts & Shortcuts]

Assigned Tester: Rudi | **Operating System:** Windows 11 / Windows
Test Suite: Part A: Core GUI Shell & General Tasks | **Date:** September 20, 2026
Execution Progress: 6 of 6 Completed (100%) | **Total Defects:** 8
Logged

1. Executive Summary & Defect Matrix

Test Item	Status	Key Observations & Defect Summary
1. Task Compose & Autosave	DEFECT	Autosave passed. Drag & drop failed (no drop zone; shows ∅ cursor).
2. Context Inspector (Alt+C)	DEFECT	Behind the Scenes passed. Alt+C keyboard shortcut unresponsive.
3. Running Screen Controls	DEFECT	Plan passed. Stop button hung for 5m 52s (delayed stop). Toast missing.
4. Run History Screen	DEFECT	Stopped runs badged COMPLETED. Modal dialog used instead of drawer.
5. Artifacts Screen	PASSED	Run folders verified. Built-in video preview passed. Explorer open

		passed.
6. Favorites Shelf	DEFECT	Add folder & attach passed. Right-click & inline 'x' missing (trash icon used).

2. Detailed Findings & Defect Log

Test 1: General Task Compose & Draft Autosave

✓ PASSED: Draft Autosave Functionality

Composed prompt text persisted reliably when switching between rail tabs and returning to "+ New task".

⚠ BUG-01: Drag and Drop Document Not Supported (No Drop Zone)

- **Expected:** Dragging a document from Windows Explorer into the task card attaches the file.
- **Actual:** Hovering the dragged file displays the Windows prohibition cursor (⊘). No drop zone exists in code.
- **Workaround:** Users must click the manual "Add file" button.

Test 2: Context Inspector Panel (Alt + C)

✓ PASSED: 'Behind the Scenes' Prompt Breakdown

Expanded cleanly after "Make a plan", rendering "01 YOU SAID", "02 PRISM'S TASK BRIEF", and "03 ENGINEERED PER-TOOL PROMPTS".

⚠ BUG-02: Keyboard Shortcut 'Alt + C' Unresponsive

- **Expected:** Pressing `Alt + C` on the keyboard toggles the right-hand

Context Inspector panel.

- **Actual:** `Alt + C` produces no action. Shortcut is unmapped in `main_window.py`.
- **Workaround:** Users must click the small collapsed chevron icon in the top-right corner.

Test 3: Running Screen Controls (Stop & Retry)

✓ PASSED: Plan Generation & Pipeline Initiation

"Make a plan" accurately parsed the task into sequential stages and "Start the work" initiated execution.

⚠ BUG-03: Stop Button Does Not Halt Immediately (Hangs for 5m 52s)

- **Expected:** Clicking the red Stop button halts execution immediately.
- **Actual:** Clicking Stop disabled the button and changed label to "Stopping...", but the background Perplexity step ran for **5m 52s** before concluding.
- **Root Cause:** Engine does not forcefully abort in-flight browser/network requests.

⚠ BUG-04: 'View Partial Results' Toast Missing & Misleading Dialog

- **Expected:** Halting the run displays a toast notification with the message "View partial results".
- **Actual:** No toast is shown. Instead, a completion modal dialog falsely claims "✓ Prism finished the work", even though the user deliberately stopped the run and Step 2 was cancelled.

Test 4: Run History Screen

✓ PASSED: Past Run Record Rendering & Follow-up Launch

Past runs re-render with step-by-step descriptions, prompt queries, and outputs. Clicking "Follow up" launches continuation.

⚠️ BUG-05 (Critical): Stopped Tasks Falsely Badged as '[✓ COMPLETED]'

- **Expected:** Tasks cancelled/stopped by the user should be badged as 'Stopped' or 'Cancelled'.
- **Actual:** The History list marks stopped runs (e.g. Batman and Space tasks) with green [✓ COMPLETED] badges, despite no deliverables being captured.

⚠️ BUG-06: Detail Drawer Missing (Replaced by Modal Dialog)

- **Expected:** Clicking a past run slides out a Detail Drawer from the right.
- **Actual:** PRISM launches a blocking modal dialog (Run history - Prism).

⚠️ BUG-07: Action Button Label Discrepancy

- **Expected:** Button labeled "Continue this run".
- **Actual:** Button is labeled ↑ Follow up (and is hidden on runs where no content was captured).

Test 5: Artifacts Screen

✓ PASSED: Organization, Built-in Preview & Windows Explorer Launch

Each past run has its own dedicated folder. Built-in media preview plays video reels directly in-app. Clicking "Open the folder" cleanly launches Windows File Explorer at the exact artifact directory.

Test 6: Favorites Shelf

✓ PASSED: Add Favorite & Quick-Attach to Task

Adding a PC folder via the "+" button listed it under Favourites. Double-clicking the favorite attached the folder to the task composer (showing "Already attached."). Deletion via the rail's trash icon successfully removed it.

BUG-08: Right-Click Context Menu & Inline 'x' Missing on Favorites

- **Expected:** Right-clicking a favorite item or clicking an inline 'x' removes it.
- **Actual:** No right-click context menu and no inline 'x' exist. Removal requires selecting the row and clicking the header trash icon ().
