

# PRISM QA Test Report & Defect Log

Scope: 6. Rudi — Windows [Whole Core (No Add-ons) — Shell, Navigation, History, Artifacts & Shortcuts]

|                    |                                        |                   |                                        |
|--------------------|----------------------------------------|-------------------|----------------------------------------|
| Assigned Tester:   | Rudi                                   | Operating System: | Windows 11 / Windows                   |
| Test Suite:        | Part A: Core GUI Shell & General Tasks | Execution Date:   | September 20, 2026                     |
| Total Checkpoints: | 6 Sections (100% Completed)            | Final Outcome:    | TEST SUITE COMPLETE (8 Defects Logged) |

## 1. Executive Summary & Defect Matrix

| Test Section                         | Status           | Key Observations & Defect Summary                                                                        |
|--------------------------------------|------------------|----------------------------------------------------------------------------------------------------------|
| 1. General Task Compose & Autosave   | PARTIAL / DEFECT | Draft autosave passed. Drag & drop failed (no drop zone; shows ☹ prohibition cursor).                    |
| 2. Context Inspector Panel (Alt + C) | PARTIAL / DEFECT | Behind the Scenes passed. Alt + C shortcut completely failed (unresponsive).                             |
| 3. Running Screen Controls           | PARTIAL / DEFECT | Plan generation passed. Stop button hung for 5m 52s (delayed stop). Toast notification missing.          |
| 4. Run History Screen                | PARTIAL / DEFECT | Stopped runs badged as COMPLETED. Modal dialog used instead of sliding drawer. Button named "Follow up". |
| 5. Artifacts Screen                  | PASSED           | Dedicated run folders verified. Built-in video preview passed. "Open the folder" in Explorer passed.     |
| 6. Favorites Shelf                   | PARTIAL / DEFECT | Add folder & rail double-click attach passed. Right-click menu and inline 'x' missing (trash icon used). |

## 2. Comprehensive Defect & Findings Log

Test 1: General Task Compose & Draft Autosave

✓ PASSED: Draft Autosave Functionality

Composed prompt text persisted reliably when switching between rail tabs and returning to "+ New task".

⚠ BUG-01: Drag and Drop Document Not Supported (No Drop Zone)

**Expected:** Dragging a document from Windows Explorer into the task card attaches the file.

**Actual:** Hovering a dragged file over the application displays the Windows prohibition cursor (☹). No drop zone exists.

**Workaround:** Users must click the manual "Add file" button.

Test 2: Context Inspector Panel (Alt + C)

✓ PASSED: 'Behind the scenes' Prompt Pipeline Expansion

Expanded cleanly after "Make a plan", rendering "01 YOU SAID", "02 PRISM'S TASK BRIEF", and "03 ENGINEERED PER-TOOL PROMPTS".

⚠ BUG-02: Keyboard Shortcut 'Alt + C' Unresponsive

**Expected:** Pressing Alt + C on the keyboard toggles the right-hand Context Inspector panel open and closed.

**Actual:** Pressing Alt + C produces no action. Shortcut is missing from `main_window.py`.

**Workaround:** Users must click the small collapsed chevron icon in the top-right corner.

Test 3: Running Screen Controls (Stop & Retry)

✓ PASSED: Plan Generation & Pipeline Initiation

"Make a plan" accurately parsed the task into sequential stages and "Start the work" initiated the active workers.

⚠ BUG-03: Stop Button Does Not Halt Immediately (Hangs for 5m 52s)

**Expected:** Clicking the red Stop button halts execution immediately.

**Actual:** Clicking Stop disabled the button and changed label to "Stopping...", but the background Perplexity step ran for **5m 52s** before concluding.

**Root Cause:** Engine does not forcefully abort in-flight browser/network requests.

⚠ BUG-04: 'View Partial Results' Toast Notification Missing & Misleading Dialog

**Expected:** Halting the run displays a toast notification with the message "View partial results".

**Actual:** No toast is shown; instead, a completion modal dialog appears stating "✓ Prism finished the work" with a green checkmark, even though the user deliberately aborted the run.

Test 4: Run History Screen

✓ PASSED: Past Run Record Rendering & Follow-up Launch

Past runs re-render with step-by-step descriptions, prompt queries, and outputs. Clicking "Follow up" on completed runs initiates continuation.

⚠ BUG-05 (Critical): Stopped Tasks Falsely Badged as '[ ✓ COMPLETED ]'

**Expected:** Tasks cancelled/stopped by the user should be badged as 'Stopped' or 'Cancelled'.

**Actual:** The History list marks stopped runs (e.g. Batman and Space tasks) with green [ ✓ COMPLETED ] badges, despite no deliverables being captured.

⚠ BUG-06: Detail Drawer Missing (Replaced by Modal Dialog)

**Expected:** Clicking a past run slides out a Detail Drawer from the right.

**Actual:** PRISM launches a blocking modal dialog (Run history - Prism).

⚠ BUG-07: Action Button Label Discrepancy

**Expected:** Button labeled "Continue this run".

**Actual:** Button is labeled ↑ Follow up (and is completely hidden on runs where no content was captured).

Test 5: Artifacts Screen

✓ PASSED: Organization, Built-in Preview & Windows Explorer Launch

Each past run has its own dedicated folder. Built-in media preview plays video reels directly in-app. Clicking "Open the folder" cleanly launches Windows File Explorer at the artifact directory.

Test 6: Favorites Shelf

✓ PASSED: Add Favorite & Quick-Attach to Task

Adding a PC folder via the "+" button listed it under Favourites. Double-clicking the favorite attached the folder to the task composer, reporting "Already attached.". Deletion via the rail's trash icon successfully removed it.

⚠ BUG-08: Right-Click Context Menu & Inline 'x' Missing on Favorites

**Expected:** Right-clicking a favorite item or clicking an inline 'x' removes it.

**Actual:** No right-click context menu and no inline 'x' button exist. Removal requires selecting the row and clicking the header trash icon (🗑).
